Education

Concordia University, Bachelor in Software Engineering September 2022 - April 2027

Experience

Software Developer Internship, Ericsson – Montreal, QC January 2026 – August 2026

DevOps & Infrastructure

- Owned daily reliability of 20+ release-critical CI/CD pipelines, driving cross-team root-cause analysis, eliminating false-positive runs through pipeline enhancements, and documenting failure patterns to reduce resolution time
- Reduced performance and stability test report generation time by up to 33% by replacing Selenium-based UI extraction with direct Grafana API calls, improving pipeline reliability across version upgrades
- Developed AI agent skills automating performance testing, documentation, report generation, and knowledge-sharing workflows across QA/LSV teams

Software Development & Testing

- Developed features across a cloud-native IAM platform handling authentication for 130M+ users, with unit, component, performance and functional test coverage
- Benchmarked 15+ OAuth APIs and Kafka event pipelines using JMeter with controlled pod isolation (HPA limiting, synthetic data, scaled dependencies)

Software Developer Internship, Novatek International – Montreal, QC January 2024 – January 2026

- Led end-to-end planning and delivery of a mission-critical VCS migration involving IT, QA, and senior VPs, rescuing 20+ years of source code and 200,000+ files from unstable legacy infrastructure
- Engineered an internal migration tool transferring 700,000+ commits with full history, tags, and access controls by reverse-engineering an undocumented legacy VCS system
- Deployed VisualSVN infrastructure integrated into CI/CD pipelines, then built an SVN-to-GitLab CLI tool enabling the company's transition from legacy VCS to Git

Projects

Natural Language to SQL Engine | Python, PyTorch, Flask, Next.js April 2026

- Built an end-to-end data pipeline unifying 134K examples across 5 sources, then fine-tuned Llama 3 8B with QLoRA (4-bit NF4, LoRA rank 16) for SQL dialect generation
- Designed and deployed AskDB, a full-stack web application where users provide a DDL schema and query their database in natural english language

Certifications

Deep Learning Specialization – *DeepLearning.AI / Coursera* January 2026

Anthropic Developer Certifications – *MCP, Claude Code, Subagents, Claude Skills* April 2026

Technical Skills

Languages: Python, Java, Bash, PowerShell, SQL

AI/ML: PyTorch, Hugging Face, LoRA/QLoRA, LLM fine-tuning

Testing & Observability: JMeter, Selenium, Grafana, JUnit

Cloud & DevOps: AWS, Docker, Kubernetes, Helm, Jenkins, JFrog, GitLab CI

Databases: MySQL, MongoDB, Cassandra, Neo4j, Redis
